RAVEN

Precision Simplified®

You've heard about Slingshot. It's an innovative precision ag system that offers reliable, high-speed connectivity via cell technology, cloud-based data transfer and management, full data security and wireless RTK corrections.

From the beginning, Slingshot was developed to work as an open ecosystem. This means it's designed to work with software developed by other companies. We're not trying to control your choices like some companies do — we're expanding your opportunities and improving your productivity.

Slingshot can be integrated with the software you already own — whether it's custom or off-the-shelf. It's surprisingly easy. Adding Slingshot powers up your software's value and capabilities.

SLINGSHOT SOFTWARE PARTNER CAPABILITIES

With Slingshot and these software solutions – or your current software – you get unprecedented precision ag power.

AGRONOMY AND GIS

	Nutrient Planning	Variable Rate Nutrient Rec Creation	Soil Testing Tools	Multi-Year Analysis	Zone and Boundary Management	Crop Scouting Tools	Product Label Database	Reporting and Record Keeping	File Management	Wireless Data Transfer

Slingshot and Viper® 4: Better Together

Viper® 4, Raven's powerful new fourth generation field computer, was designed to bring out the best in Slingshot.

Viper 4 works with equipment of every color, providing a simple, connected precision ag platform. It features an intuitive, tablet-style, touchscreen interface, customizable by user or machine.

Together with Slingshot, Viper 4 offers increased efficiency and productivity through better product, process and data management for your commercial operation.

Attention Software Providers

Slingshot's open API is intended to give you the tools you need to develop high quality precision ag-related software. We're ready to work with you to create Slingshot-compatible products.

Speak to your Slingshot representative to learn more; call 800-243-5435 or visit RavenSlingshot.com.

WELCOME TO SLINGSHOT 2.0

Has it been a while since you checked out Slingshot? We've upgraded, so it's time to take another look. New features include:

- Totally redesigned and intuitive interface
 - One-Click Remote Support
 - Send multiple files to multiple Raven field computers simultaneously
 - New job report viewer and editor
- Streamlined file management and file structure, allowing you to move, sort, filter and place files in folders for simpler managing and viewing of data online
- Multi-employee permission structures that better support your growing operations
- And much more — Slingshot 2.0 is a culmination of several "cloud-friendly" enhancements that improves overall system performance

WHY SLINGSHOT?

Slingshot combines wireless connectivity with robust online tools to upgrade your level of control and efficiency.

SLINGSHOT FIELD HUB

Designed to work with major cell phone networks in North America and around the world, the Slingshot Field Hub serves up high-speed Internet on your field computers.

SLINGSHOT RTK

The Slingshot Field Hub allows you to access Slingshot's advanced RTK correction signals, or those provided by third-party providers, such as CORS networks. Slingshot's cellular-based RTK enables you to operate without worrying about line of site limitations characteristic of radio-based RTK.

SLINGSHOT GS — COMING SOON

Slingshot GS is a new cellular-delivered correction service with decimeter accuracy, without the need for a local reference station. You can even leverage your existing Slingshot Field Hub and Raven GPS hardware to access Slingshot GS. Talk to your Raven dealer for more information on pricing and compatibility.

SLINGSHOT ONLINE

Store your job data from Raven field computers in your secure Slingshot database that you can access anytime, anywhere with a simple Web browser. Observe your fleet and manage operations with any laptop, desktop or mobile computer from anywhere in the world.

SLINGSHOT REMOTE SUPPORT

With Slingshot, you get real-time, in-field remote support. You don't have to leave the cab — we're able to see your screen, diagnose, fix or walk you through the issue.

BENEFITS OF SLINGSHOT

Slingshot is constantly improving and always up to date with support for the latest Raven products. We're continually adding new functionality and features to help you get the most out of your hardware.

In addition to the features and functionality available directly through the Slingshot Web portal, Slingshot also lets you utilize the benefits of connectivity and cloud-based solutions in the software package of your choice. Slingshot's open platform means you can integrate the functionality of Slingshot directly into the applications that you already use to manage your business and operations. Slingshot works in a culture of collaboration with leading agriculture software and application providers.
